High Rigidity Body and Cover

High rigidity body:

One piece aluminum extrusion structure and the best structural rigidity and weight ratio calculated by finite element analysis.

Cover's flexing resistance:

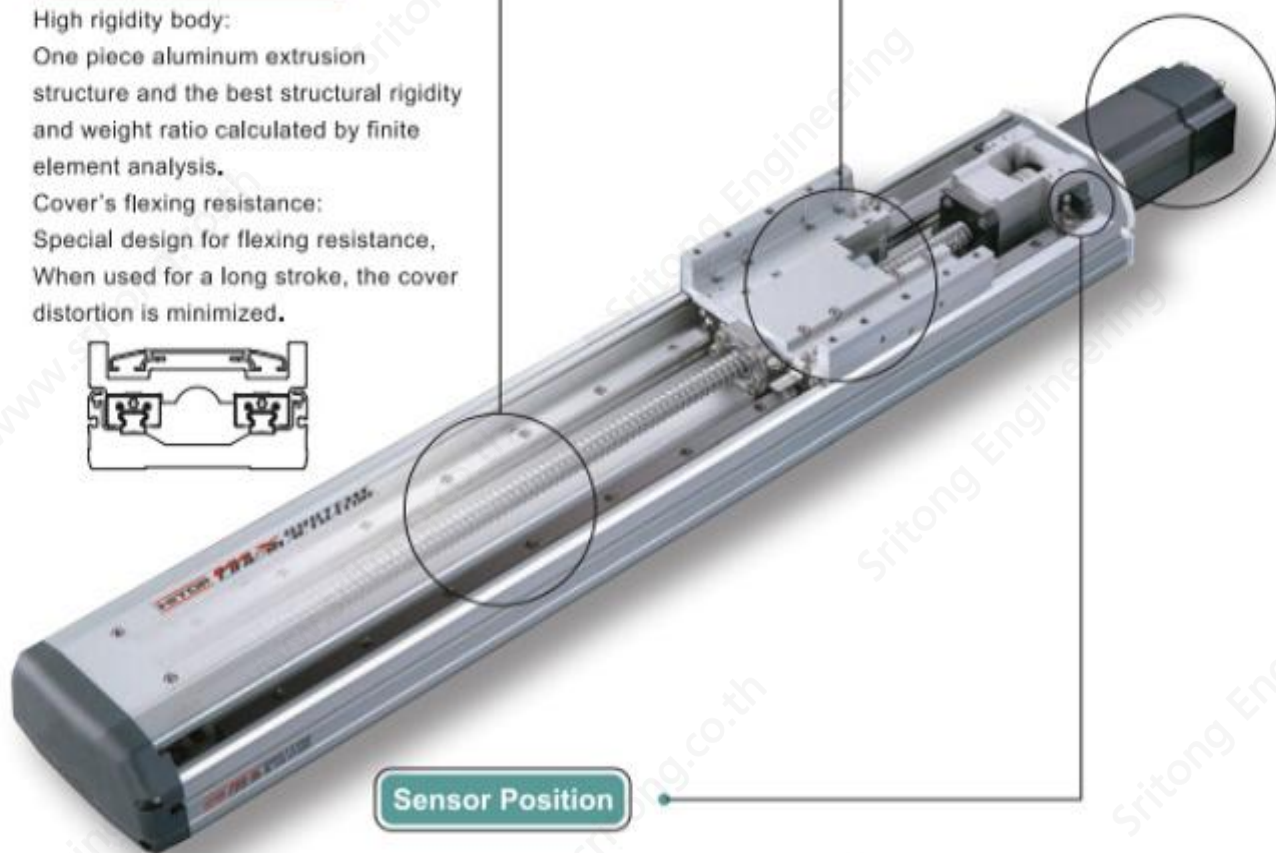

Special design for flexing resistance, When used for a long stroke, the cover distortion is minimized.

Motor Manufacturer

Servotronics Googol

Note: Motor and driver are installed with this product

Sensor Position

Inside sensor

Inside sensor dog

Outside sensor

Outside sensor dog

Note: Inside or outside sensor installation method are optional

EHB Seires

Internal Structure

Motor Installation Direction

E Outside direct

R Right turn-up

L Left turn-up

Note: Various motor installation directions are available
